ABOUT US

Sapiens development is a software development company founded in 2009. From day one we have focused on the process of turning business ideas into excellent software, providing technical content, motivated and committed teams who understand and have a talent for improving processes.

OUR VALUES

Values guide us in our actions, in our decisions, and in our behaviour. As a company, we are very diverse: We come from different cultures and operate in very different markets and industries. For this reason, clear values that all Sapiens Development members embrace, understand, and live by are essential to our future growth and success.

OUR OFFER

Sapiens Software turns customer business ideas into top-ofthe-line software solutions. We are your very own IT nearshore branch in 3 weeks or less. Using our existing infrastructure, no upfront investment. We create, manage, and make your nearshore IT teams successful
